The mayor and street commissioners inspected the workings of a hand road scraper on Washington street, Saturday afternoon. The machine resembles a small horse rake, only in place of the teeth are hoes. The machine was constructed by the Smith, Whitcomb & Cook Co., from designs furnished by Mayor Barclay, and while the idea seemed to be all right, this machine was too heavy for practical use. One of the machines which are used for this purpose on Scotland city streets is expected soon.

The new manager of the Barre opera house, Harry T. Eaton, has entered into a combination with the theatre managers of Bellows Falls, Brattleboro, and Lebanon, N. H., and Newport, N. H. The purpose of the managers is to secure better theatrical attractions in the regular season instead of waiting until the close of the season in the larger cities as they have been compelled to heretofore. A company playing but one night in a town would have a week's engagement from the association, and covering the entire circuit would have a small amount of traveling expenses to pay, as there would be short distances between towns to cover.

In Buying Groceries

The Wise Housewife Makes Every Cent Count.

But she can't make the pennies count by trading at every store in town, spending half her time looking for the cent-cheaper article.

She can save money only by searching out a reliable Grocer and sticking to him. The money is saved by trading with the groceryman who sells dependable goods. Dependable goods are not to be obtained in every store. Goodness and cheapness appeal to every condition of humanity.

There are no fancy prices here, and everybody is treated alike. Our goods are cheap because they're good—it's not the price that makes them cheap. Goods that are bought so cheaply that they have to be thrown away on account of poor quality are the most dearly bought goods. Better pay a fair price in the first place and get the dependable kinds. You can't buy any other kind here. We don't keep them.
